

Sabin

Dual Language Magnet School

Mr. Beeh - Science

The 8th grade students have been working on an engineering unit about force and motion. The goal of the unit is to design a pod that can be dropped from a helicopter into areas that have been affected by a natural disaster. The 7th grade students have been working on an engineering unit about plate motion. The goal of the unit is to place tsunami sensors around Sri Lanka and help them prepare for any tsunamis. Please email me if you have any questions. I can be reached at bdbeeh@cps.edu. Have a great holiday season!

Mrs. Taylor - Social Studies

It is finally the holiday season, and I think we are all in need of some good cheer after this challenging year! Our students continue to work with enthusiasm on processing the election results, and learning about history through different perspectives. The eighth graders continue to examine the role of government as part of our new Civics curriculum. I am so proud of all the perseverance and enthusiasm our students have demonstrated over the last few months. They are an outstanding group, with so much to be proud of. I hope the holidays bring all of you rest, good health, and peace.

Ms. Hernandez - ELA

Students will continue to study nonfiction text by building all the essential nonfiction comprehension reading skills taught during the previous units. Students will not only restate what a text teaches, but also analyze and evaluate the information. They will be taught skills to help acquire and apply technical vocabulary, use note-taking strategies to help develop their

December Birthdays

7th Grade

3rd - Jezenya Lopez
13th - Jeremiah Gonzalez
14th - Martin Shores
15th - Isaiah Roldan
17th - Alina Cole-Figueroa
21st - Key'ara Tillman

8th Grade

3rd - Xitlali Jaramillo
4th - Arianna Harmon
22nd - Monserrat Mendoza-Delgado
23rd - A'yana Mullen

grade students will be working on unit on ratios and proportional relationships. The students will be working on Lesson 4.2 Constant Rates of Change Lesson 4.3 Proportional Relationships and

DECEMBER 2020

Mr. Torres -
Math

Ms. Sartin: Math

The eight grade students will continue on: representing proportional relationships of change and slope, and interpreting rate as slope. The students will be using basic skills on math such as: adding, subtracting, multiplying and dividing to find unit rate of change and slope.

Students are assessed on daily participation, assignments, quiz and tests using the Go math curriculum and Freckle.

Congratulations to all the students that constantly joined my classes during the month of November!!!

I thank you in advance, for your support.

Christmas Break is quickly approaching. We continue our working learning about proportional relationships and the connections to slope. Please be on the lookout for an email from the eighth grade team this week in regards to a graduation survey. Happy Holidays and be safe.

Ms. Adamo - Diverse
Learning Specialist

During these first four weeks of the second quarter, our 7th & 8th grade diverse learners have focused on vocabulary, spelling, punctuation, and grammar to improve the quality of their writing. In reading, students have been reviewing and deepening their understanding of figurative language while working with metaphor and simile. As we close out 2020, students will endeavor to produce longer pieces of writing, extending their understanding of structure and organization. Please feel free to contact me at my email address: KSAdamo1@cps.edu or by cell: (224) 408-0057 with any questions, concerns, or ideas.

Ms. Manlapaz - Diverse Learning
Specialist

Can you believe it? We are halfway through the 2nd Quarter! December is such a wonderful time of the year and despite having stayed at home for 10 months this year, there is still much to be thankful for. Thank you to all the 7th and 8th grade students and families I have worked with because you have been working hard and have been cooperative in moving towards the same direction we set out in the first place- to learn as much as we can in these unusual conditions.

Just a reminder on our lessons- for the 7th graders we are still working with Rational Numbers, Rates and Proportionality, Proportions and Percent throughout this Quarter, and for the 8th Graders, we are about to proceed with Proportional and Non-proportional Relationships. Progress Reports go out on December 18 so try to finish all the work you need to do so that you will have a relaxing Winter Break!

Please don't hesitate to email me mcmmanlapaz@cps.edu for any questions and clarifications on your student.
