THANKSGIVING

MR. SILVA: ELA

During the month of November we will be bringing our Deep study of Characters Unit to an end. Students will finalize their Personal Narratives as well. We will also take some time to prepare for our next unit focusing on non-fiction texts. It is extremely important that all students are present and ready to learn. Please be sure to check that your child is completing all the required assignments.

MR. CERDA: SOCIAL STUDIES

Hello families of the 5th and 6th grade! We have completed our first remote learning quarter. To tell the truth, I am not sure who learned more, the students or the teachers. We are entering another quarter and with our new information on how to learn and with our new abilities, we are going to advance in our abilities and new learning opportunities. A few things you can do to ensure that your student has an opportunity to learn. Please make sure your students are logging in everyday and staying for the entire class time. Also, if it is possible to limit the noise and distractions to the learning environment. This includes but not limited to adding to the distractions by wanting your student to complete tasks during the school day, cleaning up their spaces, doing household duties, or caring for small children. If you could please lower the television and music and the excitement of life, (there is a lot of yelling sometimes lol). I too have children learning at home. I understand the challenges and I admit, I am not supporting my children's learning at home as much as I can as well. Though I am going to do my best. And I know you will do yours. Thank you in advance and happy learning.

Mr. Madrigal: Math/Enrichment

In math, the 6th grade students will be completing Unit 2 of Go Math! on Operations with Fractions. In our next chapter, the students will be learning about Proportionality; Ratios and Rates. Representing ratios and rates, applying ratios and rates, and percents. Please encourage your child to complete homework assignments and complete Freckle assignments.

Ms. Lohens: Math/Enrichment

This month in 5th grade we will be working on adding and subtracting decimals. Remember, your child's daily attendance is important for their academic success. Please check Google Classroom and Aspen for missing assignments and grades. Please do not hesitate to reach out to me via email with any questions, comments, or concerns.

5th and 6th Grade

MR. KLAUS: SCIENCE

Your child should have received some extra credit work to complete by today. All Science and Health

assignments should be completed by Thursday morning 11/05/20. I will be making new student groups for the 2nd Quarter and students will change topics for their Science learning. We will continue Health class each Friday during the 2nd Quarter, starting on 11/13/20. Look for information coming about Teacher and Parent meetings on 11/18/20.

1. November 6th- No classes- Professional Development Day for Teachers
2. November 11th- There IS school on Veteran's Day
3. November 18th No classes- Report Card "Pick-up" You will receive instructions from your child's homeroom teacher.
4. November 25th-27th- No Classes- Thanksgiving Break
