

## “THE MAGIC KINGDOM”

Room 111

Mrs. Anderson, Mrs. Storm, Mrs. Sawyer, Mr. Agbabiaka

### Assessments

We will be assessing the students for skill mastery. This will also support us in placing the students in groups and meeting with parents to give tips on helping their child.

**Schedules** All students need to be on time for attendance, weather, calendar and foundational skills learning. These are important math and literacy skills. The foundational skills will be assessed monthly as they are essential in preparing the students for kindergarten readiness. We would like all of our students to go into kindergarten with mastery of Pre-K skills.

**Small Groups:** They students will have daily small group instruction daily at 2:45 with the staff. They will complete activities in each subject. Please ask which teacher they worked with and the activity they completed.

**Websites:** Students should go on a learning website at least 3 times a week per site [Raz-Kids.com](https://www.raz-kids.com) and [education.com](https://www.education.com)). Students who work on these sites will not only develop mastery in Pre-K skills they also will learn how to work independently. They only need to spend a maximum of 15-minutes on the website.

**Calm Classroom and Second Steps** - The students will work on Social Skill development by doing daily meditations twice a day and developing skills on self control and how to get along with others. You will receive handouts of the lesson and information to access the SEL website.

**Specials:** Please ask the children what projects or activities they are doing in Physical Education, World Language. Media, Technology and Art.

**NO SCHOOL** Monday, October 11, 2021 Indigenous Peoples Day
